DETAILED ACTION

Election/Restrictions

This application contains claims drawn to an invention nonelected with traverse in Paper No. 6. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 26-30 rejected under 35 U.S.C. 102(e) as being anticipated by US 5,637,919 (hereafter Grabbe).

Grabbe discloses, referring to figures 1 and 2, an electronic component (10) to be mounted on a printed board (16), said electronic component comprising: and electrical connecting surface (44a); a plurality of electrical connecting portions (20) provided on said electrical connecting surface in arrangement positions; and at least

Art Unit: 2827

one reference mark (48, 46) located on a surface of the electrical component and serving as a reference for the arrangement positions of said electrical connecting portions [claim 26], wherein said at least one reference mark comprises a pair of reference marks positioned symmetrically with respect to a center point of said electrical connecting surface, wherein said electrical connecting portions are disposed in an array that surrounds said reference marks [claim 27], wherein said reference marks are located in a central portion of said electrical connecting surface, and said electrical connecting portions are disposed around said reference marks [claim 28], wherein said reference mark is provided on a side of said electrical connecting surface (44a) that is adapted to confront a mounting portion of the printed board [claim 29], wherein said reference mark comprises a projection [claim 30].

Response to Arguments

Applicant's arguments with respect to claims 26-30 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 31-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2827

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
